Marcus Callon

All things Product & Customer - passionate about early-stage product concept, development and validation and solving problems that matter for Customers and Users.

Brisbane, Queensland, Australia

Summary

I have spent the last 20 years developing, leading and building and successful software products, teams and projects.

I have extensive Product Management, Delivery Management and Solution Architecture experience working with or for a range of start-ups, SMEs, large enterprises and government organisations.

I am passionate about start-ups and early stage businesses and leading product direction and development and working closely with customers and commercial teams in order to shape a product's vision and validating its value to real users.

I am currently the co-founder and CTO and Product Manager with Holoscribe, a product for to publish web based 360°, Virtual Reality and Augmented Reality experiences.

I am currently the co-founder and "product/solution guy" at Focal Labs, a service based start up enabler, looking to support MVP development and commercial momentum for early stage concepts.
